

TOTO's Clean Dry (Suction / High-speed Dual Sided Type) Hand Dryer Receives iF Design Award 2024

-Awarded 11 Years in a Row-

TOTO LTD. (Headquarters: Kitakyushu, Fukuoka Prefecture; President: Noriaki Kiyota) has received a design award for its product, Clean Dry (suction / high-speed dual sided type) hand dryer, as part of the prestigious international iF Design Award*¹ 2024.

The iF Design Award has continued to be a prestigious design award since 1953, and is sponsored by iF (International Forum Design) based in Hanover, Germany. One of TOTO's products, Clean Dry (suction / high-speed dual sided type) was highly appraised in a strict screening carried out by a panel of judges made up of well-known design experts. This marks the eleventh consecutive year that TOTO has received the Award.

TOTO will continue to pursue the fusion of design and technology to introduce products worthy of the TOTO name to the world, thereby contributing to the realization of "a sustainable society" and "clean, comfortable, and healthy lifestyles."

Feature of the Award-Winning Product

Clean Dry (suction / high-speed dual sided type)

Clean Dry (suction / high-speed dual sided type) has a simple configuration with no openings on the sides, and a noiseless design with few exterior joints, for superior hygiene and ease of cleaning.

Thanks to its easy approachability due to its wide hand insertion port, the design makes it readily usable by all kinds of people, from children and the elderly to those with restricted mobility. Clean Dry (suction / high-speed dual sided type) employs a suction system that sucks in air and water droplets which prevents air from blowing back and suppresses droplet dispersal, and is designed to provide greater comfort and peace of mind during use. In addition, the sucked in air is purified through the HEPA filter^{*2} so that the hands can be dried with clean air.

The compact shape allows for a high degree of freedom in installation position, and its easy fit allows for a smooth transition from hand washing to drying, creating a clean and comfortable hand washing space.

*2 An air filter with a particle collection rate of 99.97% or higher for particles 0.3 μm in size. HEPA stands for High Efficiency Particulate Air Filter

TOTO Restroom Dresser Premium Series Receives Red Dot Design Award 2024

Prestigious International Award Received for 12 Successive Years

TOTO LTD. (Headquarters: Kita-Kyushu-shi, Fukuoka Prefecture; President: Noriaki Kiyota) received an award for its Restroom Dresser Premium Series, a top-of-the-line, semi-custom series of restroom dressers at the Red Dot Design Awards*1 2024. This marks the twelfth consecutive year that TOTO has received the Award.

The Red Dot Design Award is a prestigious international award that has continued since 1955. Organized by the Design Center North Rhine-Westphalia in Essen, Germany, the awards are granted to products after a rigorous review process conducted by design professionals, taking into account various criteria including innovativeness, functionality and quality. Among the three categories of Product Design, Brands & Communication and Design Concept, TOTO received an award in the Product Design category.

TOTO will continue to introduce distinctive products to the world fusing designs and technologies that are worthy of the TOTO name, thereby contributing to the realization of “a sustainable society” and “clean, comfortable, and healthy lifestyles.”

Feature of the Award-Winning Product

Restroom Dresser Premium Series

The Restroom Dresser Premium Series is a semi-custom restroom dresser series, with a focus on interior design that allows you to combine your favorite parts and colors according to your lifestyle and style preferences. Each product is refined to make up the restroom space and enhance comfort.

The materials of items such as faucets, remote controllers, and toilet roll holders can be color-coordinated, with metallic colors that go well with white ceramic, enabling you to enjoy high-quality coordinations that accentuate the details of the space.

Nickel color coordination

Black color coordination

You can also choose from three types of faucets for ease of use. The touchless wall faucet is a touchless AUTO FAUCET, characterized by a smooth feeling on the skin made possible by the SOFT FLOW faucet and its beautifully balanced water flow.
